

LIMITED MOLD SAMPLING AGREEMENT

THIS AGREEMENT LIMITS OUR LIABILITY – PLEASE READ IT CAREFULLY

This Limited Mold Sampling Agreement (the “Agreement”) is made effective on the date stated on page 2 of this agreement by and between **TurningStone Home Inspection, LLC** (hereinafter “Inspector”, “we”, “us” and “our”) and client named on Page 2 of this agreement (hereinafter “Client,” “You” or “Your”) (collectively “parties”). We are an independently owned and operated company engaged in the business of providing home inspection services utilizing an approved Lab for environmental laboratory analysis. You desire to have a Limited Mold Sampling Inspection (the “inspection”) performed on a home located at the address stated on Page 2 of this agreement.

Purpose. The purpose of Limited Mold Sampling is to detect the presence of mold in Client defined areas of the Subject Property.

Scope of Limited Mold Sampling. Limited Mold Sampling consists of a visual assessment for mold problems in area(s) designated by You and the collection/analysis of sample(s) in these designated area(s). Further, the objective of Limited Mold Sampling is to determine whether mold problems exist in the designated area(s) sampled at the time the Mold Sampling is performed. As such, the results of Limited Mold Sampling are not a guarantee that mold does or does not exist in the Subject Property; the results are indicative only of the presence or absence of mold in the areas sampled at the time the Limited Mold Sampling is performed. In light of no currently established Threshold Limit Values (TLVs) for the majority of substances of biological origins that are associated with building-related exposures, We follow the guidelines of the American Conference of Governmental Industrial Hygienists (ACGIH) 19.5.3.1. You understand that Limited Mold Sampling is narrower in scope than a Mold Screen. Limited Mold Sampling will be conducted only in Client-defined areas and is NOT a complete assessment of the Subject Property.

The Inspector is a generalist and is not a Certified Industrial Hygienist or expert in any specific craft or trade. If the Inspector or report recommends further action, including but not limited to consulting with a specialized expert(s), you must do so at your own expense or otherwise assume all risks associated with failure to do so. **This inspection is not technically exhaustive.** The fee charged for this Inspection is substantially less than that of a technically exhaustive inspection.

Visual Assessment. The purpose of the visual assessment is to identify visual mold contamination or conditions that may be conducive to microbial growth, for example, musty odor and/or evidence of water penetration, in the area(s) You designate. The sole purpose of the visual assessment is to detect the presence, or likely presence, of mold in the designated area(s); therefore, the Inspector will not be liable for failure to discover any conditions other than readily apparent and accessible mold, including, but not limited to, water penetration. Following the visual assessment, sample collection and lab results, the Client will be provided with a written report stating whether mold or conditions indicating mold were found in the designated area(s).

Scope of Visual Assessment/Exclusions. THE SCOPE OF THE VISUAL ASSESSMENT IS LIMITED TO READILY ACCESSIBLE AREAS DESIGNATED BY THE CLIENT ONLY. We do not remove floor and wall coverings or move furniture, open walls or perform any type of destructive inspection. Certain structural areas are considered inaccessible and impractical to inspect including but not limited to: the interiors of walls and inaccessible areas below; areas beneath wood floors over concrete; areas concealed by floor coverings; and areas to which there is no access without defacing or tearing out lumber, masonry, roofing or finished workmanship; structures; portions of the attic concealed or made inaccessible by insulation, belongings, equipment or ducting; portions of the attic or roof cavity concealed due to inadequate crawl space; areas of the attic or crawl space made inaccessible due to construction; interiors of enclosed boxed eaves; portions of the sub area concealed or made inaccessible by ducting or insulation; enclosed bay windows; portions of the interior made inaccessible by furnishings; areas where locks prevented access; areas concealed by appliances; areas concealed by stored materials; and areas concealed by heavy vegetation. Note: There is no economically practical method to make these areas accessible. However, they may be subject to attack by microbial organisms. NO OPINION IS RENDERED CONCERNING THE CONDITIONS IN THESE AFOREMENTIONED OR OTHER INACCESSIBLE AREAS.

Sampling. The Inspector will NOT be able to determine the extent or type of microbial contamination from the results of the Visual Assessment. An appropriate number of samples must be collected, as determined by the Visual Assessment, before mold can be identified in designated area(s). You will have an opportunity to have samples taken in areas of the Subject Property You designate to establish the presence and type(s) of

microbial contamination. The Inspector will send samples to an approved Lab, which will analyze them for the presence of mold. The Lab will then issue a report to You detailing the presence and type(s) of mold, if any, found in the samples. A reference guide will be provided, which explains the various types of mold along with any recommended action(s).

Services. Visual assessment and sampling locations are listed on the reverse side of this Limited Mold Sampling Agreement.

You understand and agree that any claim(s) or complaint(s) arising out of or related to any alleged act or omission in connection with the Inspection shall be reported to us, in writing, within ten (10) business days of discovery.
